WAC Decreases

Multiple manufacturers are reducing their WAC values on January 1, 2027 and are offering limited-time rebate programs during the transition. Managing inventory during this time is critical for your business.

This information is current as of **11.17.2026**. Download the latest copy here:

WAC Change Date	Manufacturer	Products	Rebate Window*	Returns Cutoff **
January 1	Novo Nordisk	Wegovy Ozempic	December 23 to 31	November 30
January 1	Boehringer Ingelheim	Jentadueto Jentadueto XR Tradjenta	December 13 to 26	December 13

**Based on Cencora invoice date.*
***Product must be received at your Cencora distribution center prior to this date.*

Action Items

1. Print this WAC Decrease handout and review with pharmacy staff members.
2. Scan the QR code above and review the manufacturer notices, which provide details on the rebate calculations and additional frequently asked questions. Also note the additional manufacturer details we've called out as those are important not to miss.
3. Assess on-hand inventory and initiate returns for excess inventory. Remember that product must arrive at DCs prior to the deadline date.
4. Adjust perpetual inventory re-order points until the WAC change date.
5. Purchase day-by-day on an as-needed basis only leading up to the rebate program windows.
6. Purchase product during the rebate window, minimizing outside purchases. Be especially mindful of rebate programs that do not run up until the end of the year and make sure you have inventory to carry you through the WAC change date.
